Keynote Presentations

Dr. Dongho Kim
University of Georgia, Athens
**What gets measured, gets managed:
Data analytics and technologies for
teachers**

Data-driven decision making is now considered one of the 21st century competencies for educators. This keynote provides an overview of data analytics and its potential for K-12 classrooms.

Dr. Fatih Demir
University of Missouri, Columbia
**Enhanced Teaching and Learning: User
eXperience (UX) Research and Design
to Enhance Teaching and Learning**

The UX Research in education will let you identify the needs of your audience. Then, you can create products that benefit both teachers and learners.

2017 LEARN-IT
